

## Hussar Pannier Bag

## Products Designed and Developed by Riders, for Riders

At Westwind, our products are designed and developed by seasoned riders who truly understand the demands of the journey. We focus on the details that matter most to motorcyclists, addressing the challenges only a rider would notice. Every product undergoes constant refinement to ensure it meets the needs of real-world adventures.

Our gear is rigorously tested—not just in laboratories but through long-distance rides that push our designs and materials to their limits. This hands-on approach allows us to create products that skillfully balance practicality, reliability, and style, ensuring every piece meets the highest standards of performance and design.

### HUSSAR Pannier Bag

26/28/30/35L

# Product Specifications

The Hussar 30/35 panniers are expertly designed for adventure touring, focusing on lightweight, durable, and secure performance. The innovative harness-mount design significantly enhances expandability, making it a versatile companion for any ride.

- Main Materials: 1680D composite mesh fabric, Hypalon
- Additional Materials: Rubber corner guards, UTX components, aluminum buckles
- Capacity: 26L, 28L, 30L, 35L
- Compatibility: Universal fit for tubular side racks
- Optional Accessories: Quick-release locks, RW3 side bags, waterproof liners
- Water Resistance: Rated IPX6

# Product Package

## Hussar Elite Plus

Model: WWH3035KIT-A / WWH2628KIT-A

- Includes one pair of panniers
- One pair of harness mounts
- Shoulder straps
- Aluminum alloy backplates
- Quick-release locks (compatible with high-exhaust setups)
- Two RW3 side pouches
- Weight: Approx. 9.2 kg (complete set)

## Hussar Classic Plus

Model: WWH3035KIT-B / WWH2628KIT-B :

- Includes one pair of panniers and one pair of harness mounts
- Aluminum alloy backplates
- Quick-release locks (compatible with high-exhaust setups)
- Weight: Approx. 8.4 kg (complete set)

## Hussar Elite

Model: WWH3035KIT-C / WWH2628KIT-C

- includes one pair of main bags and one pair of harness mounts
- Nylon fiber backplates
- Quick-release kit (compatible with high-exhaust setups)
- Weight: Approx. 8.3 kg (complete set)

## Hussar Classic

Model: WWH3035KIT-E / WWH2628KIT-E

- Includes one pair of main bags and one pair of harness mounts
- Nylon fiber backplates
- Non-quick-release kit (not compatible with high-exhaust setups)
- Weight: Approx. 7.8 kg (complete set)

## Anti-Collapse Support for Structured Stability

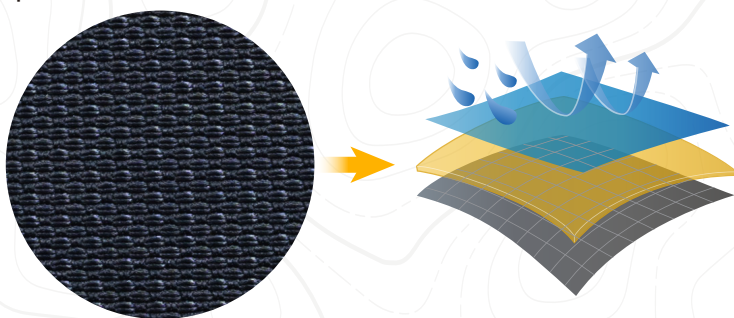

The base, sides, front, and back of the panniers are reinforced with industrial-grade PP panels, ensuring a sturdy and structured form. This design provides an organized and tidy loading space, maintaining the panniers' shape even when not fully packed, and preventing sagging.

## Westwind's Custom Reinforced Composite Fabric Innovative Materials for Extreme Performance

At Westwind, we understand that standard materials fall short of meeting our rigorous demands. Designed for the most extreme riding scenarios, our custom-developed reinforced composite fabric uses an 840D polyester base. Compared to commonly used TPU and PVC fabrics on the market, our material excels in waterproofing, abrasion resistance, and weather durability, making it the superior choice for adventure riders.

### Waterproofing

Rated at IPX6, the panniers are 100% fully waterproof with a roll-top closure that completely eliminates water ingress.

### Abrasion Resistance

Crafted with PA ballistic nylon weave, the material is highly resistant to wear and tear while offering superior anti-rip properties.

### Weather Resistance

Built to handle a wide range of climates, these panniers deliver reliable performance in extreme conditions, offering cold resistance down to  $-20^{\circ}\text{C}$  and superior moisture protection.

### Degradation Resistance

Compared to traditional TPU, the material boasts a significantly longer lifespan, lasting over 10 years even under demanding usage.

### Eco-Friendliness

Designed in compliance with EU environmental standards, ensuring sustainability without compromising performance.

# Every Detail and Function Designed with Extreme Riding in Mind

Westwind products are built upon a profound understanding of the challenges posed by extreme riding environments, ensuring every feature and detail serves the rider's needs.

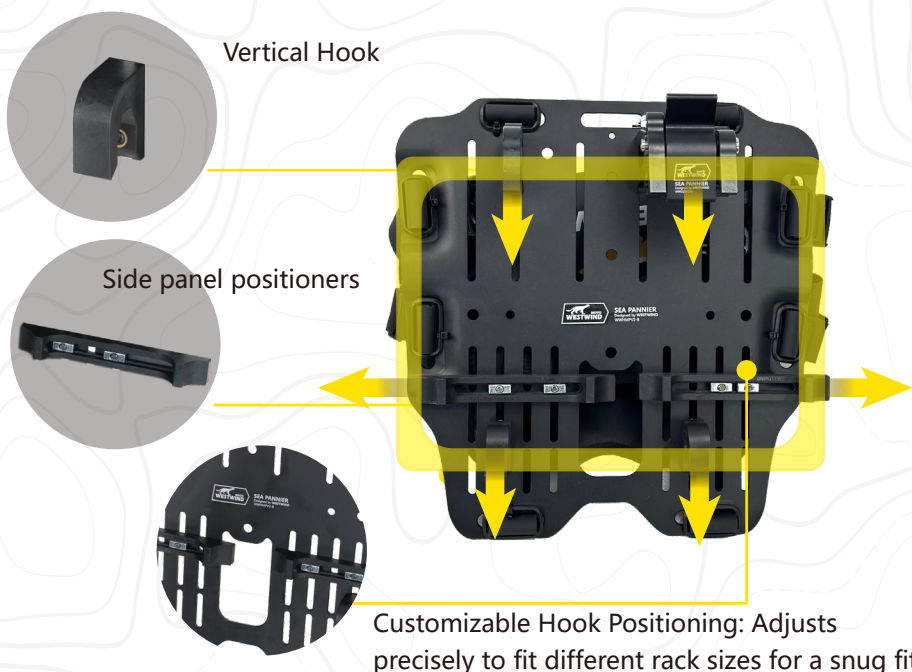

## Quick-Release System for Instant Mounting and Removal

The Light Cavalry panniers are equipped with a fast-release system featuring clamps, allowing riders to mount or remove

## Secure Mounting, No Unwanted Noise

The panniers remain firmly secured thanks to multi-directional support between the backplate and frame.

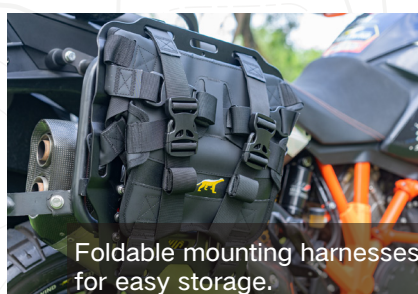

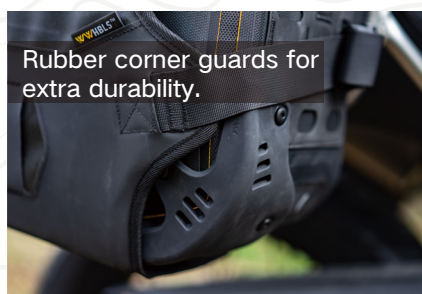

## Functionality Overview

## Additional Features

# Quick-Release Lock Installation Guide

## A. Standard Side Panel Installation:

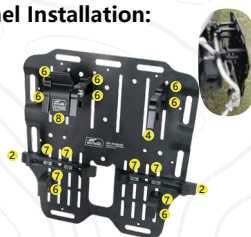

Components for a standard single side:

1. Quick-Release Lock x1
2. Side Panel Positioner x2
3. Mounting Hooks x3
5. Keys x2
- 6.5. Round-Head Hex Screws M6\*12 x7
- 7.6. Round-Head Hex Screws M6\*16 x7
- 9.7. Thread Locker x1
- 10.8. Zip Ties x8

## B. Offset Side Panel Installation:

Components for an offset single side:

2. Side Panel Positioner x2
3. Mounting Hooks x2
4. Exhaust clearance extension clamp x1
5. Keys x2
6. Round-Head Hex Screws M6\*12 x8
7. Round-Head Hex Screws M6\*16 x6
8. Extended Quick-Release Lock x1
9. Thread Locker x1
10. Zip Ties x8

### Installation Tips:

When installing, avoid fully tightening screws at the start. Ensure all screws are properly positioned and the frame is aligned before tightening. Apply thread lock to prevent loosening.

### Mounting Frame Setup:

Thread the metal hooks of the mounting harness into the corresponding slots on the backplate. Use zip ties to secure them tightly to prevent loosening.

### Waterproof Bag Installation:

Insert the waterproof bag into the mounting harness, then tighten the straps for a secure fit.
