

Handlebar Controller

How do I set up the BMW Wonder Wheel controls on the Garmin Zumo XT2 / Tread2?

- > Make sure the Garmin is in the mount, has power, and then go to APPS - Handlebar Controller
- > The following screen will appear with an image showing the buttons of the Garmin Handlebar Controller
- > You can assign functions to the buttons as shown. However, these must be translated to the BMW Wonder Wheel controls:

Triangle button: Short press = click Wonder Wheel to the right / Long press = hold Wonder Wheel to the right

+ button: Short press = rotate Wonder Wheel upward

- button: Short press = rotate Wonder Wheel downward

Circle button: Short press = click Wonder Wheel to the left / Long press = hold Wonder Wheel to the left

Click on the boxes to assign a function, for example: + button 'short press' = Zoom Out and - button 'short press' = Zoom In
